

Bautex Block

Insulated Concrete Block

Residential Delivery Guidelines

BAUTEX RESIDENTIAL DELIVERY GUIDELINES

Scheduling

In order to ensure product delivery to your project without delay, contact your Bautex Representative at least two weeks prior to needing product. This allows for adequate time to schedule trucking, confirm payment method, and verify training needs.

Equipment

It is the owner's or builder's responsibility to unload the trailer of Bautex Block once it arrives on site. You will need a forklift on site to unload pallets of Bautex Block. Truckloads are typically stacked two pallets high. This requires that the forklift be able to reach, pick, and safely offload a 600-pound pallet from a height of 9'-10'. Customers either rent, borrow, or already own light duty off-road forklifts, skid-steer machines with fork attachments, or heavy-duty tractors with fork attachments. The equipment should be onsite and ready to work before the delivery arrives.

Timeliness

It should take less than two hours to unload a full truckload of Bautex Block (68 pallets). Demerge charges will start to incur after the truck has been on site for two hours. Typically, the charges run \$100/hour and will be invoiced to the customer. Prior to delivery, determine the best location for the truck to unload efficiently in order to speed up the delivery process and avoid additional charges. In addition, plan on unloading and setting the pallets down as near to the truck as possible. This minimizes travel time from picking pallets off the truck to setting them down. Once the truck has left, pallets can be moved and staged for efficient construction.

Paperwork

The truck driver will have documentation for you to sign. The Delivery Receipt should be signed and returned to the driver as proof of delivery back to Bautex. Your copy is the Customer Copy and should be kept for your records.

For more information about shipment and delivery of Bautex Block for residential projects, please contact Construction Support by email at construction@bautexsystems.com or by phone at (855) 922-8839.
